

FB6029, FB6030, FB6031 Install Packs

Addition of Painter's Tape

Description

1002025 Painter's tape 3 pack has been added to the installation shipping packs for all Platinum equipment, effective November 2018.

The tape is 1.88" x 60 yards.

This tape is supplied for taping the base channel before grouting, and should be removed when the grout is still wet.

Best Practices

Where possible, it may be easier to affix the painter's tape to the base channel before it is laid in place. This is a more ergonomic operation than installing once the channel is in place. Take care to avoid covering areas where the channel pieces will overlap.

The painter's tape must be removed when the grout is still wet.

Ship Quantities

Pack	Description	Quantity of Painters Tape Packs (rolls)
